®

SOFT BAIT

Active Ingredient: bromethalin. . . . 0.01%
Other Ingredients. 99.99%
Total 100.00%

FOR INDOOR AND OUTDOOR USE

KILLS NORWAY RATS, ROOF RATS, HOUSE MICE, AND
ANTICOAGULANT-RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

KILLS RATS, MICE, DEER MICE, PACK RATS*, AND MEADOW VOLES*

KILLS OTHER RODENT SPECIES AS LISTED ON THIS LABEL

NORWAY RATS AND HOUSE MICE MAY CONSUME A LETHAL DOSE
IN ONE NIGHT'S FEEDING BUT IT MAY TAKE TWO OR MORE DAYS FROM
TIME OF BAIT CONSUMPTION FOR THEM TO DIE

DUE TO STOP FEED ACTION, RODENTS TYPICALLY FEED LESS
OR CEASE FEEDING ALTOGETHER AFTER CONSUMING A TOXIC DOSE

LIPHATECH®

KEEP OUT OF REACH OF CHILDREN
CAUTION: See back panel for additional
precautionary statements.

EPA Reg. No. 7173-304
Product No. 80000647

EPA Est. No. 7173-WI-1

* Use not permitted in California

Liphatech, Inc.
3600 W. Elm Street
Milwaukee, WI 53209
800-351-1476

This bait is packaged in 0.28 ounce
(8 grams) individual pouches

Approx. 227 x 8g Pouches

Net Weight: 4 lbs. (1.8 kg)

SOFT BAIT / CEBO SUAVE

FIRST AID: Have this label with you when obtaining treatment advice.	
If swallowed:	<ul style="list-style-type: none">• Call a poison control center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by the poison control center or doctor.• Do not give anything by mouth to an unconscious person.
If in eyes:	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor immediately for treatment advice.
If on skin or clothing:	<ul style="list-style-type: none">• Take off contaminated clothing.• Rinse skin with plenty of cool water for 15-20 minutes.• Call a poison control center or doctor immediately for treatment advice.
TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian at once.	
NOTE TO PHYSICIAN OR VETERINARIAN: Contains the nerve poison bromethalin. This is not an anticoagulant type rodenticide. There is no antidote. For humans or animals known or thought to have ingested bait within 4 hours, limit absorption by emesis or lavage and with multiple treatments of activated charcoal. For humans or animals showing obvious poisoning symptoms (muscle tremors, loss of hind limb use, and/or seizures) treatment should be therapeutic and supportive.	

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements:	Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet, and change into clean clothing.
---------------------------	---

ENVIRONMENTAL HAZARDS: This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL** and follow all use directions and precautions. Use only for the sites, pests, and application methods described on this label. **IMPORTANT:** Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
 2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
 3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.
- Note:** Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access the bait.
- USE RESTRICTIONS:** This product can only be used to control Norway rats, roof rats, house mice, Deer mouse (*Peromyscus maniculatus*), White-footed mouse (*Peromyscus leucopus*), Cotton mouse (*Peromyscus gossypinus*), Cotton rat* (*Sigmodon hispidus*), Eastern harvest mouse* (*Reithrodontomys humuli*), Golden mouse* (*Ochrotomys nuttalli*), Polynesian rat* (*Rattus exulans*), Meadow vole* (*Microtus pennsylvanicus*), White-throated woodrat* (*Neotoma albigula*), Southern plains woodrat* (*Neotoma micropus*), Bushy-tailed woodrat* (*Neotoma cinerea*), and Mexican woodrat* (*Neotoma mexicana*) in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites. Fence and perimeter baiting beyond 100 feet from a structure, as defined above, is prohibited. Do not sell this product in individual containers holding less than 4 pounds of bait. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feed, food or feed handling equipment, or milk or meat handling equipment. Do not apply directly to food or feed crops. Do not broadcast bait. Burrow baiting with this product is prohibited.
- *Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, Bushy-tailed woodrat, and Mexican woodrat.

Selection of Treatment Areas: Determine areas where rats, mice and/or meadow voles will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, beside burrows, or in locations where signs of rats, mice, and/or meadow voles have been observed. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice typically feed less or cease feeding altogether after consuming a toxic dose. Bait may be removed from the pouch and placed in a feeding device that secures the unwrapped bait in a bait station. Discard empty wrapper in the trash.

Mice and Meadow Voles*: Apply 1 to 2 pouches per placement, usually spaced 8 to 12 feet apart. Up to 4 pouches may be needed at points of very high activity.

Rats: Apply 4 to 24 pouches per placement, usually spaced 15 to 30 feet apart. Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with bromethalin baits than the anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all visible dead animals and leftover bait, as well as any bait that has become accessible to non-target animals. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets.
Pesticide Disposal: Wastes resulting from the use of this product may be disposed of in trash or at an approved waste disposal facility.
Container Handling: Nonrefillable container. Do not reuse or refill this container. Completely empty container, then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Label No. 20000563-0222

PARA USO EN INTERIORES Y EXTERIORES
MATA RATAS NORWAY, RATAS DE TEJADO, RATONES DOMÉSTICOS Y RATAS NORWAY, RATAS DE TEJADO Y RATONES DOMÉSTICOS RESISTENTE A LOS ANTICOAGULANTES

MATA RATAS, RATONES, RATONES CIERVO, PAQUETE DE RATAS*, Y CAMPAÑALES DE PRADO*

LAS RATAS NORWAY Y LOS RATONES DOMÉSTICOS PUEDEN CONSUMIR UNA DOSIS LETAL EN UNA NOCHE, APARECIENDO LOS PRIMEROS ROEDORES MUERTOS DOS O MÁS DÍAS DESPUÉS DE COMENZAR EL CONSUMO

DEBIDO A LA DETENCIÓN EN LA INGESTA, LOS ROEDORES, POR LO GENERAL, SE ALIMENTAN MENOS O DEJAN DE ALIMENTARSE CONJUNTAMENTE LUEGO DE CONSUMIR UNA DOSIS TÓXICA.
*USO NO PERMITIDO EN CALIFORNIA

PRIMEROS AUXILIOS: Tenga esta etiqueta a mano cuando le aconsejen un tratamiento.	
Si se ingiere:	<ul style="list-style-type: none">• Llame a un centro de control de envenenamiento o a un doctor de manera inmediata para que le aconsejen un tratamiento.• Si la persona puede tragar, haga que beba un vaso de agua.• No induzca el vómito a menos que se lo indique el centro de control de envenenamiento o el médico.• No le administre nada por boca a una persona que está inconsciente.
Si hay contacto con los ojos:	<ul style="list-style-type: none">• Mantenga abierto el ojo y enjuague lenta y suavemente con agua durante 15 a 20 minutos.• Quite los lentes de contacto, en caso de usarlos, después de los primeros cinco minutos y luego continúe enjuagando.• Llame a un centro de control de envenenamiento o a un doctor para que le aconsejen un tratamiento.
Si entra en contacto con la piel o la ropa:	<ul style="list-style-type: none">• Quite la ropa contaminada.• Enjuague la piel con abundante agua fría durante 15 a 20 minutos.• Llame a un centro de control de envenenamiento o a un doctor para que le aconsejen un tratamiento.
TRATAMIENTO POR ENVENENAMIENTO DE MASCOTAS: Si el animal come algún cebo, llame al veterinario de inmediato.	
NOTA PARA EL MÉDICO O VETERINARIO: Contiene brometalina, un veneno que actúa sobre el sistema nervioso. No es un rodenticida de tipo anticoagulante. No tiene antidoto. En el caso de que seres humanos o animales hayan ingerido un cebo, dentro de las primeras 4 horas se puede limitar la absorción mediante el vómito o lavaje estomacal y con varios tratamientos de carbón activado. En el caso de seres humanos o animales que presenten síntomas de envenenamiento (temblores musculares, pérdida de la función de los miembros posteriores o convulsiones) el tratamiento debe ser terapéutico y de sostén.	

DECLARACIONES PREVENTIVAS

PELIGROSO PARA PERSONAS Y ANIMALES DOMÉSTICOS

PRECAUCIÓN: Es perjudicial si se traga o absorbe a través de la piel. Causa irritación moderada en los ojos. Evite el contacto con la piel, los ojos o la ropa. Manténgalo alejado de los niños, animales domésticos y mascotas. Todos aquellos que manipulen el producto (incluidos quienes lo apliquen) deben usar pantalones largos, zapatos, calcetines, y guantes impermeable. Toda persona que recoja animales muertos o cebos sin utilizar después de la aplicación de este producto debe usar guantes impermeables.

Requisitos Para la Seguridad del Usuario:	Siga las instrucciones del fabricante para limpiar y mantener el equipo de protección personal (EPP). Si no hay instrucciones para las prendas lavables, utilice detergente y agua caliente. Mantenga y lave el EPP aparte del resto de la ropa para lavar. Quite el EPP inmediatamente después de manipular este producto. Lave la parte exterior de los guantes antes de quitárselos. Tan pronto como pueda, lávese las manos minuciosamente después de la aplicación de los cebos y antes de comer, beber, mascar goma, usar tabaco o usar el baño, y póngase ropa limpia.
---	---

RIESGOS AMBIENTALES: Este producto es extremadamente tóxico a los mamíferos y pájaros. Los perros, gatos y otros mamíferos y pájaros predadores o carroñeros pueden sufrir envenenamiento si se alimentan de animales que hayan comido el cebo. No lo aplique directamente al agua o en áreas donde haya agua superficial, o en zonas intermareales que estén debajo de la marca de agua máxima promedio. No contamine el agua por medio del lavado del equipo o el deshecho de residuos.

INSTRUCCIONES DE USO

Es una contravención de la ley federal usar este producto de manera contraria a las instrucciones de la etiqueta.

LEA ESTA ETIQUETA y siga todas las instrucciones y precauciones. Utilícelo solamente para en los lugares, para las plagas y con los métodos de aplicación que se especifican en esta etiqueta.

IMPORTANTE: No exponga los ratidas donde haya niños, mascotas ni animales salvajes inofensivos que no son el objetivo.

Para ayudar a prevenir accidentes:

1. Almacene el producto que no esté en uso fuera del alcance de niños y mascotas.
 2. Aplique el cebo en lugares fuera del alcance de niños, mascotas, animales domesticos y animales salvajes inofensivos que no son el objetivo, o bien póngalo en trampas de cebo resistentes a las alteraciones. Estas trampas deben ser resistentes a la destrucción por parte de perros y niños menores de seis años de edad y deben usarse de tal manera que eviten que dichos niños lleguen a los compartimentos del cebo y tomen contacto con él. Si el cebo puede salirse de las trampas al levantarlas, las unidades deben estar aseguradas o fijas de alguna otra manera. Se necesitan trampas todavía más resistentes en áreas abiertas a animales con pezuñas, mapaches, osos, otros animales potencialmente destructivos o en áreas propensas al vandalismo.
 3. Descarte el recipiente del producto, producto restante, estropeado y cebo no consumido según se especifica en esta etiqueta.
- Nota:** Las estaciones de cebo son solamente para uso en exteriores, sobre la superficie. Se deben utilizar estaciones de cebo resistentes a las alteraciones si hay niños, mascotas, mamíferos que no quiera perjudicar o aves que podrían tener acceso al cebo.

RESTRICCIONES DE USO: Este producto puede usarse sólo para controlar ratas de Noruega, ratas de tejado, ratones domésticos, Ratón ciervo (*Peromyscus maniculatus*), ratón de patas blancas (*Peromyscus leucopus*), ratón de campo (*Peromyscus gossypinus*), ratas algodonerass* (*Sigmodon hispidus*), ratones cosecheros del este* (*Reithrodontomys humuli*), ratones dorados* (*Ochrotomys nuttalli*), ratas polinesias* (*Rattus exulans*), campanoles de prado* (*Microtus pennsylvanicus*), ratas de cuello blanco* (*Neotoma albigula*), ratas de los llanos sureños* (*Neotoma micropus*), ratas de cola tupida* (*Neotoma cinerea*), y ratas mexicanas* (*Neotoma mexicana*) en y dentro de un perímetro de 100 pies de estructuras erigidas por el hombre y construidas de manera tal que sean vulnerables a invasiones de roedores comensales, o bien, para rodear o atacar plagas de roedores. Entre dichas estructuras se encuentran las casas y otras residencias permanentes o temporales, centros procesadores de alimentos, edificios industriales y comerciales, recipientes de basura, edificios agrícolas y públicos, vehículos de transporte (buses, trenes, aeronaves), muelles y edificios portuarios o terminales, así como estructuras relacionadas alrededor de estos lugares y asociadas con ellos. Se prohíbe colocar cebos y cercas en perímetros que estén a más de 100 pies de una estructura, según se define arriba. No venda este producto en envases individuales con menos de 4 libras de cebo. No lo coloque cerca o dentro de las aberturas de conductos de ventilación. No contamine el agua, los alimentos, el pienso, los equipos de manipulación de alimentos o pienso, o los equipos para el manejo de la leche o la carne. No lo aplique directamente a alimentos o forrajes. No esparza el cebo. Está prohibida la colocación de cebos de este producto en madrigueras. *No permitido para el uso contra las siguientes especies en California: ratas algodonerass, ratones cosecheros del este, ratones dorados, ratas polinesias, campanoles de prado, ratas de cuello blanco, ratas de los llanos sureños, ratas de cola tupida, y ratas mexicanas.

Selección de las áreas de tratamiento: En general, es a lo largo de paredes, junto a rendijas mordisqueadas, en los rincones y lugares ocultos, entre los pisos o paredes, junto a las madrigueras o en lugares donde se han observado signos de ratas, ratones o ratones del prado. Retire todos los alimentos alternativos que sea posible.

INSTRUCCIONES DE APLICACIÓN: El ingrediente activo de este producto es diferente a los ratidas anticoagulantes. Las ratas y los ratones individuales, por lo general, se alimentan menos o dejan de alimentarse conjuntamente después de consumir una dosis tóxica. El cebo se puede quitar de bolsa y colocar en un dispositivo de alimentación que asegure el cebo desempaquetado en una estación del cebo. Deseche la envoltura vacía en la basura.

Ratones y campanoles de prado*: Aplique 1 a 2 bolsas por punto de colocación, espaciaron generalmente 8 a 12 pies (2.5 a 3.7 metros) aparte. Pueden ser necesarias hasta 4 bolsas en los puntos de mayor actividad.

Ratas: Aplique entre 4 a 24 bolsas por punto de colocación, espaciaron generalmente 15 a 30 pies (4.5 a 9 metros) aparte. Ajuste la cantidad de cebo administrada al nivel esperado de ingesta de la rata en cada ubicación de cebo.

Estrategia para tender la trampa de cebo: El consumo más alta de cebo se espera que ocurra durante los primeros dos días después de que comienza el tratamiento. Después de varios días, inspeccione el lugar y rellene el cebo en los sitios donde haya evidencia del consumo abundante o donde haya evidencia continua de actividad de roedores. Normalmente, el volumen de cebo ingerido será significativamente inferior con cebos de brometalina que con cebos anticoagulantes. Aunque el consumo de una noche usualmente suministrará una dosis letal, mantenga el cebo durante, al menos, una semana para que todos los roedores ingieran el cebo. Continúe con la trampa de cebo hasta que todas las señales del consumo hayan cesado.

Seguimiento: Reemplace el cebo contaminado o descompuesto inmediatamente. Utilice guantes impermeables para recolectar y eliminar todos los animales muertos visibles y el cebo restante, como también cualquier cebo que pueda quedar expuesto ante aquellos animales que no quiera perjudicar. Para evitar la reinfestación, limite lo más posible la disponibilidad de agua, lugares aptos para madrigueras y alimentos que atraigan ratones. Si ocurre la reinfestación, repita el tratamiento. Para una infestación continua, instale trampas de cebo permanentes y reabastezca el cebo según se necesite. (122220)

ALMACENAMIENTO Y ELIMINACIÓN

No contamine el agua, la comida o el forraje mediante el almacenamiento o la eliminación.
Almacenamiento del pesticida: Guárdelo en el envase original, en un lugar fresco y seco fuera del alcance de los niños y las mascotas.
Eliminación del pesticida: Los desechos que se generen por el uso de este producto pueden eliminarse en la basura o en una instalación aprobada para la eliminación de desechos.
Manipulación del envase: Envase no recargable. No vuelva a utilizarlo ni a recargarlo. Cuando el envase esté totalmente vacío, ofrézcalo para reciclaje o reacondicionamiento; o bien, pinchelo y deséchelo en un vertedero sanitario.

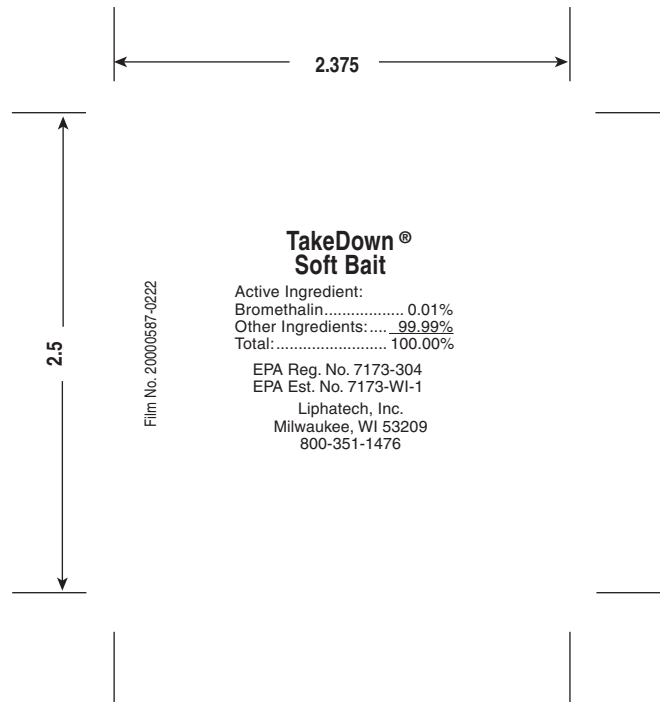

GARANTÍA: En la medida que cumpla con la ley aplicable, el vendedor no concede garantías, expresas ni implícitas, referentes al uso de este producto aparte de lo indicado en la etiqueta. El comprador asume todos los riesgos del uso y/o la manipulación de este material cuando dicho uso y/o manipulación sea contraria a las instrucciones de la etiqueta.

Approx. 908 x 8g Pouches

This bait is packaged in 0.28 ounce (8 grams) individual pouches

Net Weight: 16 lbs. (4 lbs. x 4) Case

USE RESTRICTIONS: This product can only be used to control Norway rats, roof rats, house mice, Deer mouse (*Peromyscus maniculatus*), White-footed mouse (*Peromyscus leucopus*), Cotton mouse (*Peromyscus gossypinus*), Cotton rat* (*Sigmodon hispidus*), Eastern harvest mouse* (*Reithrodontomys humuli*), Golden mouse* (*Ochrotomys nuttalli*), Polynesian rat* (*Rattus exulans*), Meadow vole* (*Microtus pennsylvanicus*), White-throated woodrat* (*Neotoma albigula*), Southern plains woodrat* (*Neotoma micropus*), Bushy-tailed woodrat* (*Neotoma cinerea*) and Mexican woodrat* (*Neotoma mexicana*) and in within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites. Fence and perimeter baiting beyond 100 feet from a structure, as defined above, is prohibited. Do not sell this product in individual containers holding less than 4 pounds of bait. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feed, food or feed handling equipment, or milk or meat handling equipment. Do not apply directly to food or feed crops. Do not broadcast bait. Burrow baiting with this product is prohibited.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, Bushy-tailed woodrat and Mexican woodrat.

Selection of Treatment Areas: Determine areas where rats, mice, and/or meadow voles will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, beside burrows, or in locations where signs of rats, mice, and/or meadow voles have been observed. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: The active ingredient in this product is different from anticoagulant rodenticides. Individual rats and mice typically feed less or cease feeding altogether after consuming a toxic dose.

Bait may be removed from the pouch and placed in a feeding device that secures the unwrapped bait in a bait station. Discard empty wrapper in the trash.

Mice and Meadow Voles: Apply 1 to 2 pouches per placement, usually spaced 8 to 12 feet apart. Up to 4 pouches may be needed at points of very high activity. **Rats:** Apply 4 to 24 pouches per placement, usually spaced 15 to 30 feet apart. Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with bromethalin baits than the anticoagulant baits. Although one night's feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing waterproof gloves, collect and dispose of all visible dead animals and leftover bait, as well as any bait that has become accessible to non-target animals. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed. (122220)

Do not contaminate water, food or feed by storage or disposal

Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of in trash or at an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Completely empty container, then dispose of empty container in trash or at an approved waste disposal facility.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
